

Core Platform Setup (Users, Groups, and Roles)

Overview

The **Core Platform Setup** phase establishes the identity and access management framework for the project within the ServiceNow platform. This phase focuses on creating users, organizing them into groups, and assigning appropriate roles based on their responsibilities.

Two primary users are created:

- **Alice** – Project Manager
- **Bob** – Team Member

A **Project Team** group is created to organize collaboration, and custom roles are configured to implement Role-Based Access Control (RBAC). The **Project Manager** role provides full access to project and task records, whereas the **Team Member** role is limited to viewing and updating only assigned tasks. This setup ensures secure access, accountability, and efficient project management.

Story: Creation of Users

Objective

Create user accounts in ServiceNow for the Project Manager and Team Member.

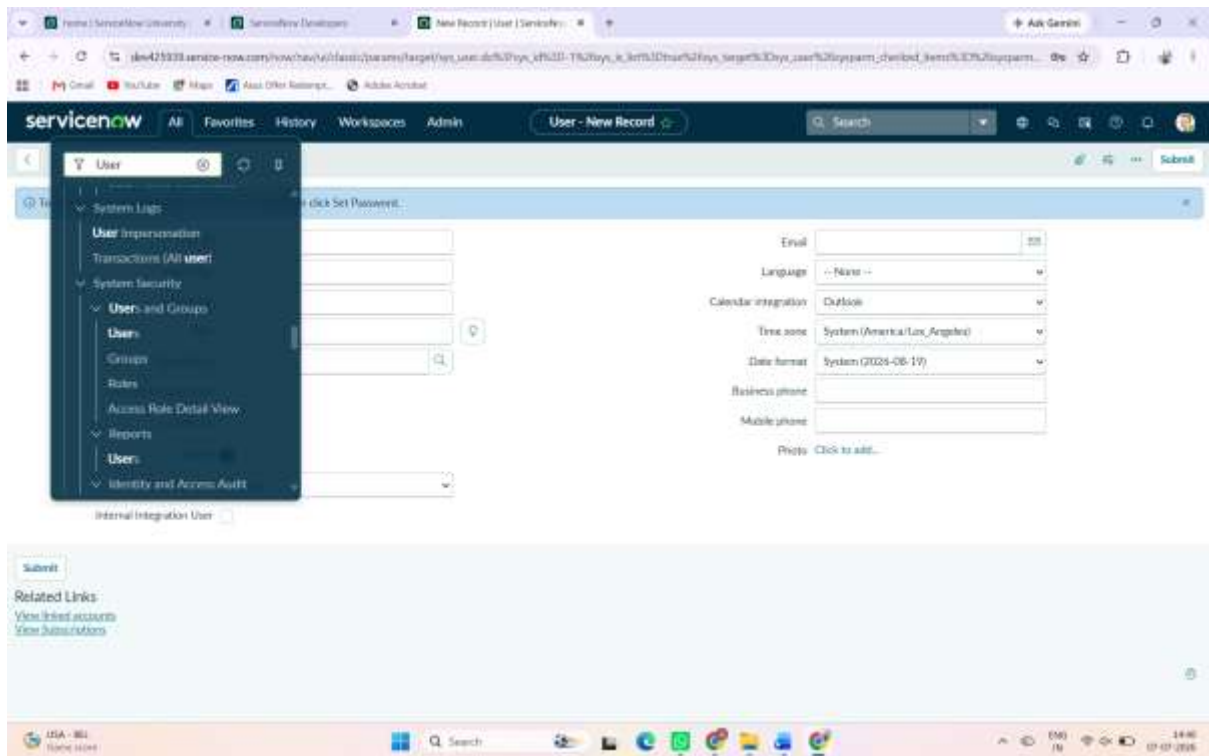

Steps to Create Users

Step 1: Navigate to Users

Open the Application Navigator and navigate to:

System Security → Users

Click the **New** button to create a new user.

Step 2: Create User – Alice

Enter the following information:

Field	Value
-------	-------

Name	Alice
------	-------

User ID	alice
---------	-------

Role	Project Manager
------	-----------------

Active	Yes
--------	-----

Click **Submit** to save the user.

Responsibilities of Alice

- Create Projects
- Create Tasks
- Assign Tasks
- Monitor Progress
- Approve Completed Tasks

- Manage Project Records

Step 3: Create User – Bob

Click **New** again.

Enter the following details:

Field Value

Name Bob

User ID bob

Role Team Member

Active Yes

Click **Submit**.

Responsibilities of Bob

- View Assigned Tasks
- Update Task Status
- Add Work Notes

- Complete Assigned Tasks

The screenshot shows the ServiceNow 'User - New Record' form. The form is for creating a new user record. The fields are as follows:

- User ID: (empty)
- First name: Bob
- Last name: (empty)
- Title: (empty)
- Department: (empty)
- Password needs reset: (checkbox, unchecked)
- Locked out: (checkbox, unchecked)
- Active: (checkbox, checked)
- Identify type: Human
- Internal Integration User: (checkbox, unchecked)
- Email: (empty)
- Language: -- None --
- Calendar integration: Outlook
- Time zone: System (America/Los_Angeles)
- Date format: System (2024-08-19)
- Business phone: (empty)
- Mobile phone: (empty)
- Photo: Click to add...

A blue banner at the top of the form area says: "To set up the User's password, save the record and then click Set Password."

A "Submit" button is located at the bottom left of the form.

Below the form, there are "Related Links" for "View linked accounts" and "View Subscriptions".

The bottom of the screen shows a Windows taskbar with various icons and the system clock at 14:28 on 07/07/2024.

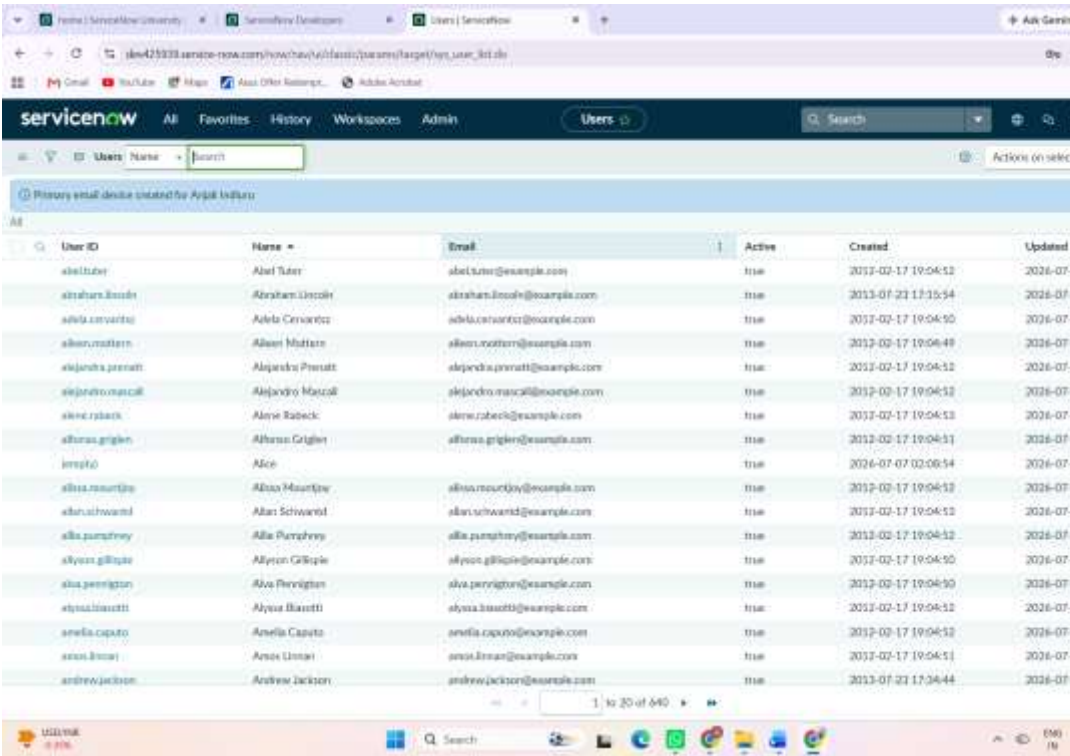

Step 4: Verify User Records

After saving both users, verify that they appear in the Users list.

User	Assigned Role
Alice	Project Manager
Bob	Team Member

User

Assigne
d Role

The screenshot shows the ServiceNow 'Users' page. At the top, there's a navigation bar with 'Users' selected. Below it, a search bar and a 'Filter' button are visible. A message states: 'Primary email device created for Ajayk Indrani'. The main area contains a table of users with columns: User ID, Name, Email, Active, Created, and Updated. The table lists 20 users, including Alice, Bob, and others. At the bottom, a pagination bar shows '1 to 20 of 640'.

User ID	Name	Email	Active	Created	Updated
ab01tutor	Abel Tutor	abel.tutor@example.com	true	2017-02-17 19:04:12	2016-07

andrew.jackson	Andrew Jackson	andrew.jackson@example.com	true	2013-07-23 17:34:44	2016-07

Expected Outcome

After completing this activity:

- Alice is successfully created as the **Project Manager**.
- Bob is successfully created as the **Team Member**.
- Both users are available for group membership and role assignment in the next phase.
- The identity framework required for implementing Role-Based Access Control (RBAC) is established.

Conclusion

The successful creation of user accounts forms the foundation of the ServiceNow application. By defining **Alice** and **Bob** with their respective responsibilities, the project establishes a secure identity management framework. These users will later be assigned to the **Project Team** group and granted appropriate roles, enabling controlled

access to project and task records while ensuring accountability and efficient workflow execution.
